# About the company

Founded by Laurence Saugé in 2019 and based in Orléans, Boutures d'Objets is an ecodesign studio and editor, specialized in the manufacturing of high-end objects made with alternative and innovative, recycled or biosourced materials.

- the studio : design researches on the uses of new materials, development of tailor-made projects for luxury brands or interior architects : objects, packaging, furniture, event decorations, stock recycling...
- the collection : lighting and objects edited in small series and in partnership with designers. Made in France.

# THE COLLECTION

# SCALAÉ

## Design Marin Thuéry

Scalaé appears as an invitation to a light show awakening and then fading away in order to shape the stairs of this pocket amphitheater.

Floor lamp with dimmer

Available in three materials :

Wasterials foundery black sand, oyster shells, and brick.

Ø 27cm - h 15cm. Weight: 2,5kg. To use indoors. Socket E14 | 220-240V. LED bulb included : 4W warm white. Black textile cable

# SOLARIUM

Design Valérie Windeck

Solarium lamp is a tribute to the sun, a perfect circle which beams softly. The simple packaging makes the lamps flat, easier to deliver.

Disk 100% recycled PET (packaging)

Base 100% PEDH recycled (various industrial wastes)

H 36cm, L 28cm, I 12cm. To use indoors. Lampe. Socket E14 | 220-240V. LED bulb included 5W - warm light. Black textile cable.

# SEPALUM

Design Valérie Windeck

Inspired by a flower bud with faceted sepals, its shape allows the lamp to be placed up or tilted.

This lamp can also be hanged on the ceiling (on demand)

Made with 80% recycled shuttlecocks and upgraded in France.

Ø20cm - h 13cm (without the bulb). Weight : 1kg. LED bulb included : Ø 9cm E27  
220-240V MAX 7W.

# VOLUBILIS

Design Jenna Kaës

On this lamp, the light source is not centered, so that it goes through one side of the disk, which can be rotated on its axis to be examined, like we do with a mineral.

Disk made with recycled plastic (from cosmetic waste, packaging)

Colors in limited edition.

Stainless steel wall mounting.

Ø32cm - thickness 8cm. To use indoors. Socket E14 | 220-240V LED bulb included 5W– warm light. Textile cable.

# GEOM

## Design Sára Kele

Conceived to combine esthetism and functionality, this vase is made of two elements : a glass bottle which glides and becomes invisible in a terrazzo block made with sea shells with contrasting surfaces.

Composed by upgraded sea shells : oyster shells and scallops shells, mineral binder and vegetal pigments.

Ø20cm - ép. 8cm. Weight : 3,5 kg.

## VASEAS et VASEO

### Design Valérie Windeck

Like a finely chiselled block, the two-piece vases Vaséas welcomes light floral compositions as well as sophisticated ones. Stems of flowers and foliage can curl up in the multiple grooves of this two-in-one vase.

Available in wasterial of oyster shells or windshield.

Vaseas Ø20cm -h 21cm

Vaseo Ø12cm -h 20cm

# CORYMBE

Design Laurence Saugé

material creation Johé Bruneau

A flower holder vase for a single flower or a bouquet. Every disk completing the vase is unique thanks to its colors and patterns, reminding of an abstract painting.

Glass : upcycled wine bottle

Flower holder made with recycled plastics (toys, garden furnitures...)

Petit : Ø 11cm - h 15cm

Grand : Ø 14cm - h 20cm

# SILEXUS

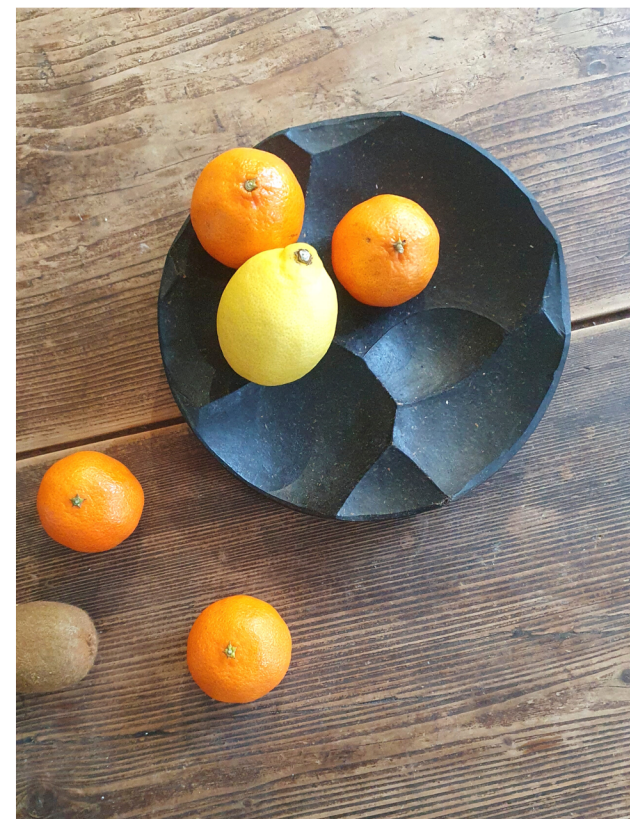

Design Louise Rué

Silexus finds inspiration in the work of stonemason. A stone block worked by the hand of a sculptor becomes an object useful in daily life. Silexus is what is left after the stone cutting.

Tray - empty pockets

Coffee grounds or avocado pits (100% foodwaste)

Ø 22cm - h 5cm. Weight : 2 kg.

# LUCE

## Design Valérie Windeck

Candle holder with a base, similar to a carved stone, and a glass bell protecting the flame. Can be used whether outdoors and indoors. It is possible to put a longer candle as well.

Upcycled wine bottle

Wasterial : foundry black sand, windshield glass, pink limestone

15cm x 9cm - Weight : 700g

# SUSTAINABLE CONCEPTION

Our sustainable vision mainly focuses on the choice of reused materials, small series locally manufactured and timeless shapes.

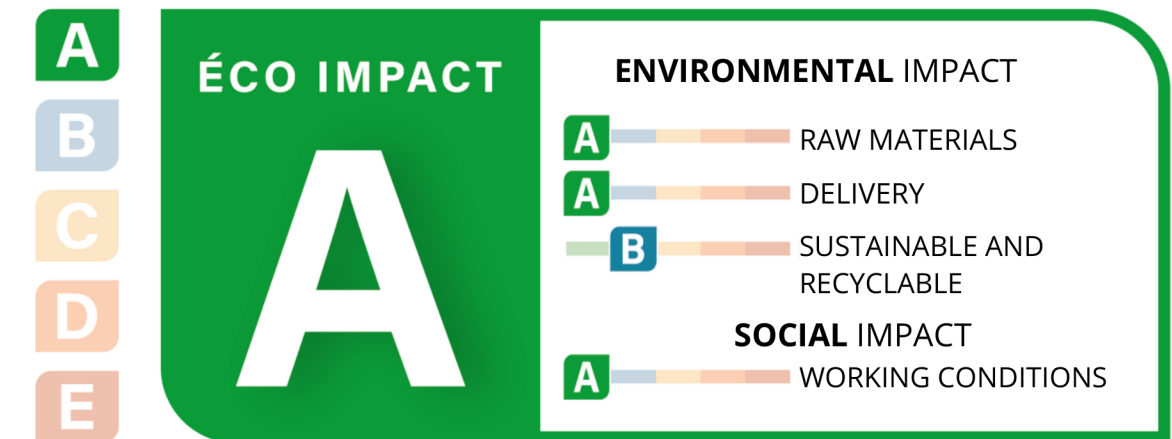

By letting Eco-impact organization evaluate our products, we reinforce our transparent approach, our fight against greenwashing and identify the axis we can improve.

Three fundamental criteria are taken into account for the evaluation

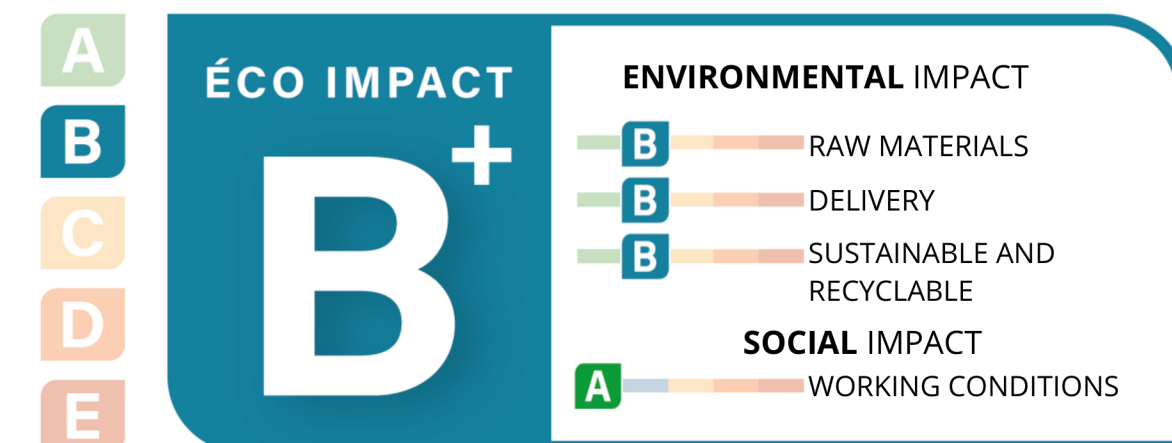

- durability
- repairability
- working conditions
